COVID-19 Medical supplies

About HOCA Capital

HOCA Capital NV is a private equity company based in Belgium, right at the heart of Europe. We are active in a wide range of industries and focus on investing in companies developing business between China and Europe. The company is led by Belgian management and we have an extensive team in China.

HOCA Medical

Ever since its establishment, healthcare has been one of HOCA Capital's key industries. We have been investing in and contributing to further (international) growth of medical companies. Our well-established network in China brings together an important mix of investors, suppliers and leading healthcare experts.

COVID-19 Pandemic Outbreak

Due to the worldwide coronavirus pandemic outbreak, there is an acute shortage of infection control products as mouth masks, goggles, gloves and other protective gear. Manufacturers are flooded with requests from companies and governments seeking medical supplies for their (frontline) staff. European governments and private companies are struggling to find reliable suppliers who can offer quality products at market price and arrange transport.

In view of this situation, we opt to utilize our decade long experience and built up network in China to work with various suppliers in China to guarantee effective delivery at a competitive price.

Our team in China has arrangements with several Chinese manufactures and suppliers, carries out on-site quality controls and arranges customs and export formalities. All producers have the necessary CE certificates and already supply the Chinese provincial governments and European national governments.

What sets us apart:

- We do onsite **quality checks** at the factories in **China**
- You only have to pay in full when the **goods arrive in Belgium**
- We take care of all **export and import** formalities
- We arrange all **logistics**
- You sign the **contract** with a **Belgian firm**
- We have **stock** in **Belgium**
